

Quarterly Journal of Engineering Geology and Hydrogeology

The journal is abstracted and/or indexed in Current Contents, ASCA, Science Citation Index, Groundwater On-Line, Geological Abstracts, International Civil Engineering Abstracts, Petroleum Abstracts, Geotechnical Abstracts, GeoArchive, GeoRef and Geobase.

Advertising sales: Please contact Jonathan Knight, Century One Publishing Limited, Alban Row 27–31 Verulam Road, St. Albans, AL3 4DG, UK (tel: 01727 893894; direct line: 01727 739193; e-mail: jonathan@centuryonepublishing.ltd.uk)

CONTENTS – Volume 48, Part 2, May 2015

Research article

Deep excavations in water-bearing gravels in Cork

M. Long, M. Murphy, T. Roberts, J. O'Brien & N. Clancy

79

Groundwater reinjection and heat dissipation: lessons from the operation of a large groundwater cooling system in Central London

D. Birks, P.L. Younger, L. Tavendale, C. Coutts, G. Parkin, P. Button & S. Whittall

94

The late field life of the East Midlands Petroleum Province; a new geothermal prospect?

C.M. Hirst, J.G. Gluyas & S.A. Mathias

104

Observations of stress-dependent microstructural changes in cement-stabilized soil

H. Chen, Z. Chen & J. Zhang

115

Rock mass parameters based doline susceptibility mapping in gypsum terrain

I. Yilmaz, I. Keskin & M. Marschalko

124

Defining a general hydrogeological model for Susak Island, Adriatic Sea, Croatia

T. Vlahović & F. Šumanovac

135

Technical Note

A note on the origins of engineering geomorphology in the UK

E.M. Lee & P.G. Fookes

147

Quarterly Journal of Engineering Geology and Hydrogeology (ISSN 1470-9236) is published in February, May, August and November by the Geological Society Publishing House for the Geological Society, London. The Geological Society, Burlington House, Piccadilly, London W1V 0JU.

Subscription rates 2015 (volume 48, 4 parts). More information about subscription options can be found at <http://www.geolsoc.org.uk/LyellCollection>. Journal Subscriptions Department, Geological Society Publishing House, Unit 7, Brassmill Enterprise Centre, Brassmill Lane, Bath, UK, BA1 3JN (tel 01225 445046; fax 01225 442836; e-mail: sales@geolsoc.org.uk). The subscription prices for 2015 to institutions and non-Fellows is: UK, £453+VAT (online only), £546+VAT (online + print); EU, £507+VAT (online only), £611+VAT (online + print); Rest of World, £507 (online only), £611 (online + print).

Outside Europe, the Journal is dispatched by various forms of airspeeded delivery. Airfreight and mailing in the USA by agent named Air Business Ltd, c/o Worldnet Shipping Inc., 156–15, 146th Avenue, 2nd Floor, Jamaica, NY 11434, USA. Periodicals postage paid at Jamaica NY 11431. US Postmaster: send address corrections to the Quarterly Journal of Engineering Geology and Hydrogeology, Air Business Ltd, c/o Worldnet Shipping Inc., 156–15, 146th Avenue, 2nd Floor, Jamaica, NY 11434, USA. Back numbers are normally dispatched by surface mail.

Cover Photograph. The cover image shows a dislocation in one span of the now disused railway viaduct at Lagonegro, Basilicata, southern Italy (40° 07' 08"N, 15° 45' 58" E). This 200m long viaduct reaches a height of 76 m above a fault-controlled valley which it crosses with 6 main arches and some small sections at the southern end as beams, and runs between two tunnels in different parts of the *Unità Lagronese (Triassic)* at each end. It was constructed in reinforced concrete in c. 1915, but in 1952 and subsequently, deformations were experienced that led eventually to the closure of this part of the line, and later abandonment of the whole railway link. These deformations have been concentrated in one arch span (shown) at the northern end of the viaduct and not in the other arches. For the past half-century, the viaduct has stood as mute testimony to the nature of ground movements in this locality, which on the basis of mapping by Professor L. Coppola, appear to be movements of a massive olistolithic block of organogenic limestone at the north end of the viaduct.
