

Quarterly Journal of Engineering Geology and Hydrogeology

The journal is abstracted and/or indexed in Current Contents, ASCA, Science Citation Index, Groundwater On-Line, Geological Abstracts, International Civil Engineering Abstracts, Petroleum Abstracts, Geotechnical Abstracts, GeoArchive, GeoRef and Geobase.

CONTENTS – Volume 51, Part 2, May 2018

Thematic set: QJEGH 50th Anniversary Review paper	
Advances in groundwater system measurement and monitoring documented in 50 years of QJEGH Mike Streetly & John Heathcote	139
Thematic set: COST Action TU1202 – Impact of climate change on engineered slopes for infrastructure	
Atmosphere–vegetation–soil interactions in a climate change context; impact of changing conditions on engineered transport infrastructure slopes in Europe A. M. Tang, P. N. Hughes, T. A. Dijkstra, A. Askarinejad, M. Brenčič, Y. J. Cui, J. J. Diez, T. Firgi, B. Gajewska, F. Gentile, G. Grossi, C. Jommi, F. Kehagia, E. Koda, H. W. ter Maat, S. Lenart, S. Lourenco, M. Oliveira, P. Osinski, S. M. Springman, R. Stirling, D. G. Toll & V. Van Beek	156
Thematic set: Construction Geomaterials	
Utilization of X-ray computed micro-tomography to evaluate iron sulphide distribution in roofing slates M. Vavro, K. Souček, T. Daněk, D. Matýšek, L. Georgiovska & V. Zajícová	169
Ultrasonic wave velocity measurements for detecting decay in carbonate rocks Giovanna Fioretti & Gioacchino Francesco Andriani	179
Research article	
Determination of contaminated land; making the right decision in the UK John Heathcote	187
On the reliability of experimental data in the geomechanical characterization of dimension stones A. C. Angrisani, D. Di Martire, D. Calcaterra, M. de'Gennaro & M. Ramondini	193
Effect of joint angle in coal on failure mechanical behaviour of roof rock–coal combined body Dawei Yin, Shaojie Chen, Xingquan Liu & Hongfa Ma	202
Characterizing void ratio and compressibility of Holocene peat with CPT for assessing coastal–deltaic subsidence Kay Koster, Ger De Lange, Ronald Harting, Eppie de Heer & Hans Middelkoop	210
The influence of geological conditions on erosion of unlined spillways in rock Kurt Douglas, Steven Pells, Robin Fell & William Peirson	219
Review of shear-wave velocity prediction equations based on piezocone penetration test data: example from Yangtze River floodplain deposits at Nanjing, Jiangsu Province, China Liyuan Tong, Hongbo Che, Mingfei Zhang & Hongjiang Li	229
Estimation of spatially distributed groundwater potential recharge for the United Kingdom M. M. Mansour, L. Wang, M. Whiteman & A. G. Hughes	247
Using stereo aerial photography and satellite InSAR to help assess slope hazards for a hydropower project in mountainous southern Albania G. J. Hearn & R. W. Duncumb	265
Overburden movement characteristics of top-coal caving mining in multi-seam areas Zhijie Zhu, Hongwei Zhang, Jan Nemcik, Tianwei Lan, Jun Han & Ying Chen	276
Technical note	
The engineering geology of playas, salt playas and salinas P. G. Fookes & E. M. Lee	287
Erratum	
Erratum for 'Vertical screening distances for total petroleum hydrocarbon for vapour intrusion risk assessment at petroleum underground storage tank sites' <i>Quarterly Journal of Engineering Geology and Hydrogeology</i>, 51, 3–12 Matthew A. Lahvis	299

Quarterly Journal of Engineering Geology and Hydrogeology (ISSN 1470-9236) is published in February, May, August and November by the Geological Society Publishing House for the Geological Society, London. The Geological Society, Burlington House, Piccadilly, London W1V 0JU.

Subscription rates 2018 (volume 51, 4 parts). More information about subscription options can be found at <http://www.geolsoc.org.uk/LyellCollection>. Journal Subscriptions Department, Geological Society Publishing House, Unit 7, Brassmill Enterprise Centre, Brassmill Lane, Bath, UK, BA1 3JN (tel 01225 445046; fax 01225 442836; e-mail: sales@geolsoc.org.uk). The subscription prices for 2018 to institutions and non-Fellows is: UK, £541 + VAT (online only), £676 + VAT (online + print); EU, £605 + VAT (online only), £756 + VAT (online + print); Rest of World, £605 (online only), £756 (online + print). More information about subscription prices can be found at <http://www.geolsoc.org.uk/lcaccess>.

Outside Europe, the Journal is dispatched by various forms of airspeeded delivery. Airfreight and mailing in the USA by agent named Air Business Ltd, c/o Worldnet Shipping Inc., 156–15, 146th Avenue, 2nd Floor, Jamaica, NY 11434, USA. Periodicals postage paid at Jamaica NY 11431. US Postmaster: send address corrections to the Quarterly Journal of Engineering Geology and Hydrogeology, Air Business Ltd, c/o Worldnet Shipping Inc., 156–15, 146th Avenue, 2nd Floor, Jamaica, NY 11434, USA. Back numbers are normally dispatched by surface mail.

Cover Photograph. Salinity testing of a groundwater fed watering hole in Lewa Wildlife Conservancy, Isiolo District, Laikipia County, north-central Kenya. Maasai counterparts are investigating water chemistry to determine the hydro-chemical signature, origin, recharge processes and travel times of a groundwater fed perennial watering hole, as part of a conservancy-wide water scarcity assessment and resilience planning initiative in the northern foothills of Mount Kenya, following severe droughts in the region. Springs discharging from Pleistocene basalts on the northern flank of Mount Kenya support year round stream flows and wetland ecosystems, which sustain one of the largest black and white rhino populations in East Africa, in addition to more than 300 zebra, 500 elephants, innumerable wildebeest and gazelle, as well as more than 40 wild cats including lions, cheetahs and leopards. The springs and local boreholes also provide drinking water supplies to more than 6000 people living within and around the conservancy.
