

# THE QUARTERLY JOURNAL OF ENGINEERING GEOLOGY

Vol. 16, No. 2

1983

Price £16.50

---

Call for papers . . . . .	i
Photographic feature: In situ treatment of a deeply weathered band of crystalline limestone, Victoria Dam . . . . .	ii
Notices from the Engineering Group of the Geological Society . . . . .	iv
L. F. LINNEY: A review of the geotechnical aspects of the construction of the first phase of the Mass Transit Railway, Hong Kong . . . . .	87
P. L. BERRY: Application of consolidation theory for peat to the design of a reclamation scheme by preloading . . . . .	103
G. WEST: Comparisons between real and predicted geology in tunnels: examples from recent cases . . . . .	113
W. R. A. KNOX & M. ZACAS: The engineering behaviour of jointed rock mass models composed of weak and strong strata . . . . .	127
D. JACKSON & J. W. LLOYD: Groundwater chemistry of the Birmingham Triassic Sandstone aquifer and its relation to structure . . . . .	135
J. A. BLAND: Fitting failure envelopes by the method of least squares . . . . .	143
T. E. DIBB, D. W. HUGHES & A. B. POOLE: The identification of critical factors affecting rock durability in marine environments . . . . .	149
Discussion by J. C. DOORNKAMP . . . . .	163
Book reviews . . . . .	165
