The following papers will be published subsequently:

- M. WALTERS & J. W. LLOYD: The use of a microcomputer for recording and analysis of borehole logging data in hydrogeological investigations
- M. MORGAN-JONES: The hydrogeochemistry of the lower greensand aquifers south of London, England
- M. A. LOVELL: Thermal conductivities of marine sediments
- R. P. YOUNG, J. J. HILL, I. R. BRYAN & R. MIDDLETON: Seismic spectroscopy in fracture characterization
- T. J. McEWEN, D. M. McCANN & S. SHEDLOCK: Fracture analysis from borehole geophysical techniques in crystalline rocks
- C. D. WARREN: Dubai Dry Dock: engineering significance of dock floor geology
- Thematic set: Applications of microcomputers in engineering geology (Editorial and eight papers)
