TUNNELLING AND UNDERGROUND SPACE TECHNOLOGY

THE OFFICIAL JOURNAL OF THE INTERNATIONAL TUNNELLING ASSOCIATION

Senior Editors: **EINAR BROCH**, *Department of Geology, The Norwegian Institute of Technology, N-7034 Trondheim, Norway* and **CHARLES FAIRHURST**, *Department of Civil and Mineral Engineering, University of Minnesota, Minneapolis, MN55455, USA*

Tunnelling and Underground Space Technology is an international journal which publishes authoritative articles encompassing the development of innovative uses of underground space and the results of quality research into improved, more cost-effective techniques for the planning, geo-investigation, design, construction, operation and maintenance of underground and earth-sheltered structures.

The journal provides an effective vehicle for the improved worldwide exchange of information on developments in underground technology - and the experience gained from its use - and is strongly committed to publishing papers on the interdisciplinary aspects of creating, planning, and regulating underground space. Towards this end, up-to-date reports of the International Tunnelling Association (ITA) working groups and important papers from major conferences sponsored by the ITA and other bodies are a regular feature of the journal.

A Selection of Papers

T HANAMURA (Japan), Japan's new frontier strategy: underground space development.

C FAIRHURST (USA) & **JUEMIN PEI** (PRC), A comparison between the distinct element method and the finite element method for analysis of the stability of an excavation in jointed rock.

P BÉREST (France), Accidents in underground oil and gas storages: case histories and prevention.

S KIYOYAMA (Japan), The present state of underground crude oil storage technology in Japan.

US NATIONAL COMMITTEE ON TUNNELLING TECHNOLOGY (USA), Contracting practices for the underground construction of the superconducting super collider.
