The cleavage of the rock, and on the left a vestige of borehole, used either for blasting or as a pilot hole for the wire saw. With a wide variety of surface finishes. The photo shows the wire saw and coolant water exiting the saw cut. A previously cut face is seen on the right, together with the extraction at Burlington Slate Ltd’s Elterwater Quarry largely by diamond sawing. The resulting product is used worldwide for flooring, roofing, building and cladding, of the Geological Society are entitled to a free subscription to the Quarterly Journal of Engineering Geology and Hydrogeology, c/o Mercury Airfreight International Ltd, 365 Blair Road, Avenel, NJ 07001, USA. Back numbers are normally despatched by surface mail. Fellows of the Geological Society are entitled to a free subscription to the Quarterly Journal of Engineering Geology and Hydrogeology or another GSL journal of their choice.

Content: Volume 40, Part 3, August 2007

Towards groundwater flood risk mapping
S. E. Morris, D. Cobby & A. Parkes

The estimation of ‘natural’ summer outflows from the Permo-Triassic Sandstone aquifer, UK
M. G. Shepley & M. Streetly

Characterization of the Ezousas aquifer of SW Cyprus for storage–recovery purposes using treated sewage effluent
G. I. Christodoulou, G. C. Sander & A. D. Wheatley

A quest to locate sites described in the world’s first publication on trichloroethene contamination of groundwater
M. O. Rivett & L. Clark

Leaching characteristics of a fine-grained calcareous sediment
S. A. Aiban

Engineering geology of landslides on the volcanic island of Montserrat, West Indies
L. J. Donnelly

A5 Llyn Ogwen peatslide, Capel Curig, North Wales
D. Nichol, G. K. Doherty & M. J. Scott

Development of a Digital Geological Compass
F. Zobl, F. K. Brunner & A. Wieser

Book reviews
