CONTENTS – Volume 43, Part 4, November 2010

Land-use and Climate Change Impacts on Landslides
Introduction to land-use and climate change impacts on landslides
M. G. Winter, N. Dixon, J. Wasowski & T. A. Dijkstra

Climate change and slope stability in the UK: challenges and approaches
T. A. Dijkstra & N. Dixon

Influence of land-use change and precipitation patterns on landslide activity in the Daunia Apennines, Italy
J. Wasowski, C. Lamanna & D. Casarano

Occurrence of landslide events and the role of climate in the twentieth century in Calabria, southern Italy
M. Polemio & O. Petrucci

Extreme weather and landslide initiation in coastal British Columbia

Debris flow, rainfall and climate change in Scotland
M. G. Winter, J. Dent, F. Macgregor, P. Dempsey, A. Motion & L. Shackman

Landslide behaviour and climate change: predictable consequences for the Ventnor Undercliff, Isle of Wight
R. Moore, J. M. Carey & R. G. McInnes

The impact of climate and climate change on infrastructure slopes, with particular reference to southern England

Effects of climate change on cycles of wetting and drying in engineered clay slopes in England
D. Clarke & J. A. Smethurst

On the impact of climate change and population growth on the occurrence of fatal landslides in South, East and SE Asia
D. N. Petley
