Exploration is always a bit of a gamble, but your odds improve significantly using the best scientific information available.

225,000+ SCIENTIFIC MAPS*
WITH 148,000+ GEOREFERENCED

With map-based search and scientific maps from trusted publishers, Geofacets is a must-have resource for today’s exploration teams.

Enrich scientific analyses and risk assessments for exploration.
Accelerate productivity and efficiency of exploration teams.
Improve discovery of maps, data and analogs.

Visit info.geofacets.com to learn more and request a product demo.

* Maps are added on a monthly basis.
Not Just Software... RockWare.
For Over 29 Years.

LogPlot™
Underground Data Management, Analysis and Visualization
- Powerful borehole-based data manager includes:
  - Geotechnical Data (e.g. compaction)
  - Geomechanics Data
  - Lithology (soil & rock)
  - Stratigraphy
- Create boring logs, cross-sections, fence diagrams and 3D models
- Contour data in 2D and 3D (iso-surfaces)
- Advanced material volumetrics
- AutoCAD (DXF) and ESRI (Shape) import/export capabilities

RockWorks®
An Indispensable Collection of Modeling, Analysis, and Display Tools
- Point and multivariate mapping tools
- Contour maps and 3D surfaces
- Section and Lease maps (land grid data included)
- Google Earth™ exports
- Gridding and block modeling tools
- Volumetrics
- Pit optimization
- Piper and Stiff diagrams
- Rose & Stereonet diagrams
- Statistical tools including histograms, scatter plots and ternary diagrams

PetraSim™
A Preprocessor and Postprocessor for TOUGH2, T2VOC, TMVOC, TOUGHREACT and TOUGH/HP/MP
- Model multi component fluid flow, heat transfer and reactive transport processes
- Saturated and unsaturated conditions
- Fractured and porous media
- Mesh generation, parameter definition, and display of results
- Now supports TOUGH-HP (parallel version of the TOUGH2 simulator)
- Applications include geothermal studies, carbon sequestration, contaminant transport modeling, vadose and zone hydrology and more

Free trials for most of our products available at www.rockware.com

Powerful, Flexible, Easy-to-Use Borehole Well Log Software
- Dozens of templates available or design your own in the drawing style
- Log designer window
- Full viewer can be distributed to clients
- Export to a variety of formats
- Free viewer can be distributed to clients

What is the Lyell Collection?
The Lyell Collection is an online collection comprising the Geological Society’s Special Publications Online Archive, Special Publications and key book series. Cutting-edge science sits alongside important historical material, benefiting from the enhanced functionality of HighWire press.
With 240,000 peer-reviewed pages, 25,000 articles and 1000 volumes, the lyellCollection is an invaluable tool for the researcher and student alike:
- Full text in HTML and PDF formats
- Active linking to cited references
- Free public access to alerts, search functions and abstracts
- Selected articles free online
- Hosted by HighWire Press

Call for more pricing

Special Publication archives
The first 300 volumes of the Geological Society’s Special Publications Online archive are available as a one-off purchase with perpetual access. Prices for the complete 300 volume online archive include a 10% discount.

The Geological Society
The Geological Society of London was founded in 1807 and is the UK national society for geoscience, with over 10,000 members. It is a global leader in Earth science publishing, dedicated to providing a high-quality service throughout the world.

Logos:
- Seismic processing and modeling
- Earth science and exploration
- Geometric analysis and interpretation
- Geographic information systems
- Geotechnical engineering
- Geophysical surveys

Levelogger Edge

Absolute Precision
We are proud to introduce the all new Levelogger Edge.

Enhanced Features
- Titanium based PVD Coating
- Stores up to 120,000 data points
- Hastelloy pressure sensor
- Improved temperature compensation and response time

The Levelogger Edge is a self-contained water level datalogger, using infrared data transfer powered by a 10-year lithium battery, offering the flexibility of installing by use of a Direct Read Cable, wireline or Kevlar cord. The Levelogger Edge has a memory capacity of 40,000 temperature and water level data points, or up to 120,000 using the new compression algorithm in linear sampling mode.

Reduce Your Monitoring Costs
The Levelogger Junior Edge and LTC Levelogger Junior provide convenient low-cost alternatives for datalogging water level and temperature. The Levelogger Junior Edge is accurate to 0.1% FS, has a 5-year lithium battery and increased memory of 40,000 data points. The LTC Levelogger Junior has the added advantage of conductivity measurement. Featuring a 5-year battery, memory for 16,000 sets of data points, and 2% accuracy.
