

CONTENTS – Volume 46, Part 4, November 2013

Thematic Set Introduction: The Stone Cycle and Conservation of Historic Buildings Introduction to The Stone Cycle and Conservation of Historic Buildings J. Cassar, M.G. Winter, B.R. Marker, E.N. Bromhead, J.W.N. Smith, D.G. Toll, N.R.G. Walton, D.C. Entwisle & T.A. Dijkstra	363
Thematic Set Invited Papers: The Stone Cycle and Conservation of Historic Buildings Durability and conservation of stone: coping with complexity H.A. Viles	367
Durability assessment of natural stone R. Přikryl	377
Stone-built heritage inventory and 'performance in use' condition assessment of stonework B.J. Smith, J.M. Curran, P.A. Warke, C. Adamson, D. Stelfox & J. Savage	391
Sourcing stone for the conservation and repair of historic buildings in Britain G. Lott	405
Thematic Set Papers: The Stone Cycle and Conservation of Historic Buildings Evolution in the use of natural building stone in Madrid, Spain R. Fort, M. Alvarez de Buergo, E.M. Perez-Monserrat, M. Gomez-Heras, M. J. Varas-Muriel & D. M. Freire	421
Replacement of Eocene white sandy limestone in historic buildings: over 100 years of practice in the Netherlands W.J. Quist, T.G. Nijland & R.P.J. van Hees	431
Recording natural stones on façades as a tool to assess their utilization and functional aspects over time H. Siedel	439
Evaluation of environmental impact on historic stone masonry through on-site monitoring appraisal A. Erkal, D. D'Ayala & V. Stephenson	449
Visual assessment of sandstone building façades: condition factors related to cleaning M. Zurakowska & J.J. Hughes	459
The use and meanings of 'time of wetness' in understanding building stone decay S. McCabe, P. Brimblecombe, B.J. Smith, D. McAllister, S. Srinivasan & P.A.M. Basheer	469
Specific surface area and salt weathering of limestones: a laboratory study C. Alves, C. Figueiredo, L.M. Ilharco, A. Fidalgo, A. Mauricio & L. Aires-Barros	477
Conservation issues with calcarenites used as historical building materials in Syracuse (Southern Italy) A. Calia, A.M. Mecchi, D. Colangiuli & L. Scudeler Baccelle	485
Research Articles Development of a national groundwater recharge map for the Republic of Ireland N.H. Hunter Williams, B.D.R. Misstear, D. Daly & M. Lee	493
The influence of aggregate texture, morphology and grading on the carbonation of non-hydraulic (aerial) lime-based mortars A. Arizzi & G. Cultrone	507

Quarterly Journal of Engineering Geology and Hydrogeology (ISSN 1470-9236) is published in February, May, August and November by the Geological Society Publishing House for the Geological Society, London. The Geological Society, Burlington House, Piccadilly, London W1V 0JU.

Subscription rates 2013 (volume 46, 4 parts). More information about subscription options can be found at <http://www.geolsoc.org.uk/LyellCollection>. Journal Subscriptions Department, Geological Society Publishing House, Unit 7, Brassmill Enterprise Centre, Brassmill Lane, Bath, UK, BA1 3JN (tel 01225 445046; fax 01225 442836; e-mail: sales@geolsoc.org.uk). The subscription prices for 2013 to institutions and non-Fellows is: UK, £419+VAT (online only), £482+VAT (online + print); EU, £469+VAT (online only), £539+VAT (online + print); Rest of World, £469 (online only), £539 (online + print).

Outside Europe, the Journal is dispatched by various forms of airspeeded delivery. Airfreight and mailing in the USA by agent named Air Business Ltd, c/o Worldnet Shipping Inc., 156–15, 146th Avenue, 2nd Floor, Jamaica, NY 11434, USA. Periodicals postage paid at Jamaica NY 11431. US Postmaster: send address corrections to the Quarterly Journal of Engineering Geology and Hydrogeology, Air Business Ltd, c/o Worldnet Shipping Inc., 156–15, 146th Avenue, 2nd Floor, Jamaica, NY 11434, USA. Back numbers are normally dispatched by surface mail.

Cover Photograph. 2013 marks the 50th anniversary of the Vaiont landslide in NE Italy, viewed from upstream in the cover photograph. Part of the flanks of Monte Toc slid into a newly completed and filled reservoir, impounded behind an extremely high doubly-curved mass concrete arch dam. While the dam did not collapse, the waves and flood that resulted from the slide caused a tragically high loss of life. Research on the failure has continued right up to the present day.

Photograph taken by the Editor in October 1986.
