### CONTENTS – Volume 49, Part 4, November 2016

**QJEGH 50th Anniversary Review Paper**

**QJEGH: there and back in 50 volumes**
M. G. Winter & E. N. Bromhead  
273

**Landslide Research in China**

**Landslide Research in China**
Zuyu Chen, Xingmin Meng, Yueping Yin, Tom Dijkstra, Mike Winter & Janusz Wasowski  
279

**Infiltration in two types of embankments and the effects of rainfall time on the stability of slopes**
Guoxiang Tu & Runqiu Huang  
286

**Performance of the reinforced right abutment slope of Zipingpu Dam during magnitude 8.0 earthquake, Wenchuan, China**
Aiwu Ren, Yujie Wang, Zuyu Chen, Yangang Song & Ping Sun  
298

**Safety monitoring and stability analysis of left bank high slope at Jinping-I hydropower station**
Chuangbing Zhou, Qinghui Jiang, Wei Wei, Yifeng Chen & Guan Rong  
308

**Research article**

**Effect of electrode configuration on electrokinetic stabilization of soft clays**
Taylan Askin & Dilek Turer  
322

**Syneresis effect on the permeability of chemically grouted sand**
Murat Mollamahmutoglu & Eyubhan Avci  
327

**Structure transition of lumpy landfills with increasing stress level**
X. S. Shi & I. Herle  
336

**A fuzzy classification routine for fine-grained soils**
Derya Toksoz, Isik Yilmaz, Hakan A. Nefeslioglu & Marian Marschalko  
344

**Geothermal exploration in the Fell Sandstone Formation (Mississippian) beneath the city centre of Newcastle upon Tyne, UK: the Newcastle Science Central Deep Geothermal Borehole**
350

**Technical Note**

**Subglacial water escape structures and shearing; a case study of hidden problems for construction below rockhead in glaciated regions**
P. A. Cowssill, M. H. de Freitas & J. J. M. van der Meer  
364

**Book review**

The Quarterly Journal of Engineering Geology and Hydrogeology is published by the Geological Society and is an established journal with subscriber numbers of over 4000 worldwide. Papers are invited from, and about, all areas of the world on engineering geology and hydrogeology topics including all relevant aspects of the approach of geology to civil engineering, mining practice and water resources. This includes but is not limited to: applied geophysics, engineering geomorphology, environmental geology, hydrogeology, groundwater quality, ground source heat, contaminated land, waste management, land use planning, geotechnics, rock mechanics, soil mechanics, geomaterials and geological hazards. The journal includes the prestigious Glossop and Ineson lectures, research papers, case histories, review articles, technical notes, photographic features, discussions, book reviews and periodic reports.

The Geological Society of London was founded in 1807, and is the oldest geological society in the world. It received its Royal Charter in 1825 and is now Britain’s national society for geology. Both a learned society and a professional body, the Geological Society is the chartering authority able to award Chartered Geologist (CGeol) status to appropriately qualified Fellows with six years relevant postgraduate experience in the practice of geology. The Society also awards the title of Chartered Scientist (CSci). Candidate Fellowship is available to those not yet qualifying for Fellowship (students). Fellows of the Geological Society can choose a subscription to the Quarterly Journal of Engineering Geology and Hydrogeology as a benefit of membership. Further information: email: membership@geolsoc.org.uk; http://www.geolsoc.org.uk; tel: +44 (0) 207 434 9944. The Society is a Registered Charity, no. 210161.
