Accurate, Reliable Water Level Dataloggers

Levelogger®
Providing worry-free, accurate water level data

The Levelogger Series of dataloggers are self-contained water level recorders. They combine a durable corrosion-resistant Helium pressure sensor, robust and reliable memory, and a lithium battery in a compact body that is easy to deploy.

Downloading water level data in the field is made convenient using the Solinst Levelogger App for your smart device, or the DataGrabber™ USB data transfer device.

Maintenance Free Vented Water Level Datalogger

• Water level monitoring with no barometric compensation required
• Hydrophobic filters & permanent desiccants
• User replaceable batteries in wellhead
• Same reliability & durability as our Levelogger®
• High accuracy of 0.05% FS

The NEW Solinst AquaVent is designed to be maintenance free, using hydrophobic filters and permanent factory installed desiccants, with convenient user replaceable wellhead batteries and custom designed durable welded cable. The AquaVent features highly accurate gaged pressure sensors, temperature sensor and datalogger.
The Quarterly Journal of Engineering Geology and Hydrogeology is published by the Geological Society and is an established journal with subscriber numbers of over 4000 worldwide. Papers are invited from, and about, all areas of the world on engineering geology and hydrogeology topics including all relevant aspects of the approach of geology to civil engineering, mining practice and water resources. This includes but is not limited to: applied geophysics, engineering geomorphology, environmental geology, hydrogeology, groundwater quality, ground source heat, contaminated land, waste management, land use planning, geotechnics, rock mechanics, soil mechanics, geomaterials and geological hazards. The journal includes the prestigious Glossop and Ineson lectures, research papers, case histories, review articles, technical notes, photographic features, discussions, book reviews and periodic reports.

The Geological Society of London was founded in 1807, and is the oldest geological society in the world. It received its Royal Charter in 1825 and is now Britain’s national society for geology. Both a learned society and a professional body, the Geological Society is the chartering authority able to award Chartered Geologist (CGeol) status to appropriately qualified Fellows with six years relevant postgraduate experience in the practice of geology. The Society also awards the title of Chartered Scientist (CSI). Candidate Fellowship is available to those not yet qualifying for Fellowship (students). Fellows of the Geological Society can choose a subscription to the Quarterly Journal of Engineering Geology and Hydrogeology as a benefit of membership. Further information: email: membership@geolsoc.org.uk; http://www.geolsoc.org.uk; tel: +44 (0) 207 434 9944. The Society is a Registered Charity, no. 210161.
