
BULLETIN OF THE ASSOCIATION OF ENGINEERING GEOLOGISTS

Edited by Fitzhugh T. Lee, United States Geological Survey

Meaningful case histories, new principles, techniques, or tools, discussions, and short reviews in engineering geology, hydrology, and environmental geology.

Published quarterly in February, May, August, and November.

Articles in volume 10, number 4, November 1973:

DAVID L. ROYSTER: Highway Landslide Problems Along the Cumberland Plateau in Tennessee

DAVID J. VARNES: Some Elements of the Term "Value" as Applied to Interpretive Geology

E. KENGNJISU AND JAMES R. WALLACE: On the Permeability of some Fractured Crystalline Rocks

WILLIAM H. BUSSEY: Suspension Grouts and their Injection

TOM LENAHAN: Discussion: Suspension Grouts and their Injection

HONORARY MEMBERS: Honorary Members of the Association of Engineering Geologists: Ruth D. Terzaghi

MEMORIAL: Memorial to Paul F. Brodersen (1937-1973) by Noel M. Ravneberg

GEOLOGICAL SOCIETY PUBLICATIONS

NEW SPECIAL PUBLICATIONS

No. 4 **Mesozoic-Cenozoic Orogenic belts:** data for orogenic studies, collated and edited by A. M. Spencer.

Over forty articles describe the structure and history of selected segments of the Mesozoic-Tertiary orogenic system. Uniformly arranged objective and quantitative data are the results of replies to a comprehensive questionnaire. The book includes: Alpine-Himalayan orogens, Circum-Pacific orogens, other orogens and a subject index.

Approx. 900 pp, cloth. £30.00 \$80.00

No. 5 **The Phanerozoic Time-Scale:** a supplement (1971), edited by W. B. Harland & E. H. Francis.

The volume supplements The Phanerozoic Time-Scale (1964) and is in two parts. Part I (120 pp.) contains abstracts of radiometric age-determination data, a cumulative index and introductory review papers. Part II (233 pp.) is a single work by P. Evans covering the Pleistocene which was not dealt with in the 1964 volume.

viii + 356 pp, 9 $\frac{3}{4}$ " x 7", cloth. £8.30 \$22.00

MEMOIRS

No. 6 **Late Pre-cambrian glaciation in Scotland** (1971), by A. M. Spencer.

Late Pre-Cambrian glaciation is recorded by the sediments of Port Askaig Tillite, present in the Dalradian along the Caledonian belt of Britain. A complex glacial history is recorded.

viii + 100 pp, 8 H/T pls, 3 folding pls, A4 size £5.50 \$14.00

No. 7

A Palaeogeological Map of the Palaeozoic Floor below the Permian and Mesozoic Formations in England and Wales with inferred and speculative reconstructions of the Palaeozoic outcrops in adjacent areas as in Permo-Triassic times (1973), By L. J. Wills.

24 pp, A4 size Map scale is 1:625,000 £2.50 \$6.50

Fellows of the Geological Society may obtain one copy of each of the above publications at a special rate. Details are given in the November Newsletter.

From: SCOTTISH ACADEMIC PRESS, 25 Perth Street, Edinburgh EH3 5DW.
