

The Quarterly Journal of
**Engineering
Geology**

Volume 8 No 4 1975

GEOLOGICAL SOCIETY

<i>President</i>	Sir Peter Kent, D.S.C., F.R.S.
<i>Secretaries</i>	Professor W. W. Bishop, Professor P. McL. D. Duff
<i>Foreign Secretary</i>	Professor W. S. Pitcher, D.S.C., D.I.C., M.I.M.M.
<i>Treasurer</i>	Dr A. J. Smith

ENGINEERING JOURNAL EDITORIAL SUB-COMMITTEE

Chairman & Scientific Editor Professor W. R. Dearman, PH.D., A.R.C.S., F.G.S.
Dr S. H. U. Bowie, Professor P. McL. D. Duff, Dr P. G. Fookes,
Mr D. Grant (representing Scottish Academic Press),
Mr I. A. Higginbottom, Dr G. P. Jones, Mr P. F. F. Lancaster-
Jones, Dr A. J. Smith, Dr A. B. Hawkins, Dr R. J. Chandler,
Dr R. K. Taylor.

THE QUARTERLY JOURNAL OF ENGINEERING GEOLOGY

The scope of the journal, within the field of engineering geology, is widely drawn. The journal is open to contributions from Fellows and non-Fellows of the Society, in this country and overseas. Papers will be considered which deal with any of the subjects within the field of geology as applied to civil engineering and mining practice, including rock mechanics, soil mechanics and geotechnics; applied sedimentology, pedology, mineralogy and petrology; geohydrology and hydrogeology; and engineering application of geophysics.

Case histories and review articles of a more general character will also be considered, particularly if these are of a timely nature. It will be editorial policy occasionally to group several related papers together in the same issue.

Scientific Editor

Professor W. R. Dearman, PH.D., A.R.C.S., F.G.S.
Department of Geology
Drummond Building
University of Newcastle-upon-Tyne
Newcastle-upon-Tyne, NE1 7RU
Telephone: 0632-28511

Assistant Scientific Editors

Dr R. K. TAYLOR
Engineering Geology Laboratories
Science Laboratories
South Road, Durham City
Telephone: 91-64971

Dr R. J. Chandler
Department of Civil Engineering
Imperial College
London SW7
Telephone: 01-589-5111

Cover Illustration

The Rodovia dos Imigrantes motorway under construction between Sao Paulo and Santos, Brazil. The photograph is of part of the Serra do Mar section negotiating the coastal escarpment by means of eleven tunnels and twenty viaducts. An unstable superficial zone up to 40 m thick has dictated the choice of shallow tunnels through hill spurs and viaducts, with difficult foundation conditions, across the intervening valleys. (Photo Aug. 1974, W. R. Dearman).

THE QUARTERLY JOURNAL OF ENGINEERING GEOLOGY

Vol. 8, no. 4

1975

Price £4

Annual subscription: £15 (\$40.00 U.S.A.); single numbers all issues £4 (\$10.00 U.S.A.);
double numbers £8 (\$20.00 U.S.A.).

Contents

DENYS BRUNSDEN, JOHN CHARLES DOORNKAMP, PETER GEORGE FOOKES, DAVID KEITH CROZIER JONES & JOHN MICHAEL HUNTER KELLY: Large scale geomorpho- logical mapping and Highway engineering design	227
D. A. SPEARS & M. J. REEVES: The influence of superficial deposits on groundwater quality in the Vale of York	255
JOHN NEWBERY & COLIN ANTHONY DAVENPORT: Geotechnical aspects of shallow sewer tunnels in urban areas	271
R. A. MONKHOUSE & M. FLEET: A geophysical investigation of saline water in the chalk of the South Coast of England	291
P. W. McDOWELL: Detection of clay filled sink-holes in the chalk by geophysical methods	303
Letters to the Editor	311
News Item; Geological Society Hydrogeological Group	313
Errata: Volume 7	313
Proceedings	315
