GEOLOGICAL SOCIETY

President
Sir Peter Kent, D.Sc., F.R.S.

Secretaries
Professor W. W. Bishop, Professor P. McI. D. Duff

Foreign Secretary
Professor W. S. Pitcher, D.Sc., D.I.C., M.I.M.M.

Treasurer
Dr A. J. Smith

ENGINEERING JOURNAL EDITORIAL SUB-COMMITTEE

Chairman & Scientific Editor
Professor W. R. Dearman, Ph.D., A.R.C.S., F.G.S.
Dr S. H. U. Bowie, Professor P. McL. D. Duff, Dr P. G. Fookes,
Mr D. Grant (representing Scottish Academic Press),
Mr I. A. Higginbottom, Dr G. P. Jones, Mr P. F. F. Lancaster-Jones,
Dr A. J. Smith, Dr A. B. Hawkins, Dr R. J. Chandler,
Dr R. K. Taylor.

THE QUARTERLY JOURNAL OF ENGINEERING GELOGY

The scope of the journal, within the field of engineering geology, is widely drawn. The journal is open to contributions from Fellows and non-Fellows of the Society, in this country and overseas. Papers will be considered which deal with any of the subjects within the field of geology as applied to civil engineering and mining practice, including rock mechanics, soil mechanics and geotechnics; applied sedimentology, pedology, mineralogy and petrology; geohydrology and hydrogeology; and engineering application of geophysics.

Case histories and review articles of a more general character will also be considered, particularly if these are of a timely nature. It will be editorial policy occasionally to group several related papers together in the same issue.

Scientific Editor
Professor W. R. Dearman, Ph.D., A.R.C.S., F.G.S.
Department of Geology
Drummond Building
University of Newcastle-upon-Tyne
Newcastle-upon-Tyne, NEI 7RU
Telephone: 0632-28511

Assistant Scientific Editors
Dr R. K. Taylor
Engineering Geology Laboratories
Science Laboratories
South Road, Durham City
Telephone: 91-64971

Dr R. J. Chandler
Department of Civil Engineering
Imperial College
London SW7
Telephone: 01-589-5111

Cover Illustration
The rodovia dos Imigrantes motorway under construction between Sao Paulo and Santos, Brazil.

The photograph is of part of the Serra do Mar section negotiating the coastal escarpment by means of eleven tunnels and twenty viaducts. An unstable superficial zone up to 40 m thick has dictated the choice of shallow tunnels through hill spurs and viaducts, with difficult foundation conditions, across the intervening valleys. (Photo Aug, 1974, W. R. Dearman).
THE QUARTERLY JOURNAL OF ENGINEERING GEOLOGY
Vol. 8, no. 4  1975  Price £4

Annual subscription: £15 ($40.00 U.S.A.); single numbers all issues £4 ($10.00 U.S.A.);
double numbers £8 ($20.00 U.S.A.).

Contents
DENYS BRUNSDEN, JOHN CHARLES DOORNKAMP, PETER GEORGE FOOKES, DAVID
KEITH CROZIER JONES & JOHN MICHAEL HUNTER KELLY: Large scale geomorpho-
logical mapping and Highway engineering design .......................... 227
D. A. SPEARS & M. J. REEVES: The influence of superficial deposits on groundwater
quality in the Vale of York ......................................................... 255
JOHN NEWBERY & COLIN ANTHONY DAVENPORT: Geotechnical aspects of shallow
sewer tunnels in urban areas ..................................................... 271
R. A. MONKHOUSE & M. FLEET: A geophysical investigation of saline water in
the chalk of the South Coast of England ..................................... 291
P. W. MCDOWELL: Detection of clay filled sink-holes in the chalk by geophysical
methods .................................................................................... 303
Letters to the Editor ........................................................................ 311
News Item; Geological Society Hydrogeological Group .................... 313
Errata: Volume 7 ........................................................................... 313
Proceedings ................................................................................... 315
